ENGINEERING INTERNSHIP JOB POSTING

POSITION: MECHANICAL ENGINEERING INTERN
LOCATION: Minneapolis, MN
DATE: February, 2016

Primary Responsibilities:

This is the Engineer-in-Training level position where the individual will perform a variety of routine engineering tasks under close supervision. Individuals will perform basic engineering tasks such as the review or development of less complex plans, performance of basic engineering calculations, developing or modifying specifications, drafting evaluation reports, performing computer modeling, and the inspection of parts of an engineering project. Primary focus shall be mechanical design tasks for industrial facilities. Some theoretical experience with piping systems, HVAC systems, and/or mechanical equipment such as pumps, motors, fans, and cooling systems would be preferable.

Minimum Qualifications

- BS degree in Mechanical Engineering in progress – expected award by 2017
- NCEES Fundamentals of Engineering (FE) Certification (preferred)
- Must possess very good organization, interpersonal skills, and be self-motivated.
- Excellent oral and written communication skills.
- Ability to work 15 to 25 hours per week.

Key Skills: Viable candidate will be a flexible and dynamic team player capable of integrating into an international team. Individuals must have excellent written and oral communication skills, along with very good organizational habits. AutoCad experience is a plus. Ability to provide excellent customer service, work well in a collaborative environment and demonstrate effective team building skills is a must.

Experience: None required

Other: Must be legally eligible to work in the US

Working Conditions: This position will work in an office environment involving computers, phones, and other personnel in close proximity.

How to Apply:

Forward cover letter and resume to: hr@aecengineering.com or IDOM, Inc., Suite 600, 330 South Second Ave., Minneapolis, MN 55401.
